

ULMA CONVEYOR COMPONENTS QUALITY POLICY	Rev.	3
	Date	19/6/18

The Quality Policy applicable to the supply of rollers, idler frames and pulleys aims to supply products with a high level of quality and reliability by complying with the requirements and continuous improvement of our Quality System, ensuring that the requirements and expectations of our customers are met, as well as the legal and regulatory requirements applicable to our activity.

Considering the company context we are organized in two lines to provide service, on the one hand, to engineering and, on the other, to the replacement market.

For this purpose, Ulma Conveyor Components Management leads the following commitments in the Organization:

- To promote the established Continuous Improvement System as a tool to increase the efficiency of this system, our products and services.
- To ensure that the Management Plan establishes Quality objectives, which allows follow and assess the progress achieved, with the implementation and maintenance of the Quality System to be seen and assessed.
- To promote the planning and acquisition of the fabrication, Quality control, facilities and human resources.
- To promote, in the matter of human resources, the planning of the competence and training of the people since we consider that they are the main asset of our organization.

We are convinced that the fulfilment of these commitments is a guarantee for continuous profitability.
